

Poly Guard Crystals[®]

Scale & Rust Preventer

Prevents Scale, Corrosion and Rust Staining.

A Poly Guard Cartridge contains 24 oz of extended release crystals that will treat 30,000 gallons of water or up to 6 months. Poly Guard Crystals prevent hard water scale, corrosion and iron build-up in water systems, equipment and appliances by forming a protective coating on metal and plastic surfaces. Poly Guard reacts with iron and manganese in water preventing the formation of scale and red or black staining of plumbing fixtures. This cartridge can be replaced in its entirety or simply replace the crystals at monthly or quarterly intervals.

Applications

For use in Commercial, Industrial, and Residential Potable Water applications.

Water Heaters	Ice Machines
Water Coolers	HVAC Equipment
Coffee Machines	Vending Machines
Food Service Equipment	Water Purifying Equipment
Refrigeration Equipment	Water Processing Equipment
